STONE & GLASS SCRUB

Hard Water Deposit Remover

Hard water deposits also known as hard water stains or mineral deposits, are a common problem on countertops, fixtures, windows, baths and showers.

Stone and Glass Scrub is an all natural, non-acidic cleaning compound that safely removes hard water deposits, residue, soap film and grout haze from natural stone and glass surfaces.

Application Instructions:

Hand Application:

- 1) Pour Stone and Glass Scrub directly onto surface or onto a microfiber towel.
- 2) Let Stone and Glass Scrub dwell on surface for one minute.
- 3) Rub aggressively with a microfiber towel, white nylon pad or a blue sponge.
- 4) Rinse and remove remaining Stone and Glass Scrub with a clean damp cloth.

Machine Application:

Use a low speed (500 - 800 RPM) buffer and a white nylon pad.

- 1) Pour Stone and Glass Scrub directly onto surface or onto a microfiber towel and spread onto the surface.
- 2) Let Stone and Glass Scrub dwell on surface for one minute.
- 3) Buff the surface with the low speed polisher and white nylon pad until desired results are achieved.
- 4) Rinse and remove remaining Stone and Glass Scrub with a clean damp cloth.
