

# POLISH PRO **CT**

## CONCRETE & TERRAZZO POLISH

### **ONE STEP SPRAY & BUFF FOR CONCRETE AND TERRAZZO**

#### **PRODUCT OVERVIEW**

POLISH PRO CT is an easy to use spray buff for concrete and terrazzo floors. POLISH PRO CT increases reflectivity to polished concrete and terrazzo floors in on easy step. POLISH PRO CT also adds scuff resistance to floors. Simply spray on floor and burnish with a high speed burnishers or swing machines.

#### **ADVANTAGES**

- **Increases reflectivity and shine on concrete & terrazzo floors**
- **Enhances color**
- **Reduces surface abrasion**
- **Does NOT resist acid**
- **Gloss & hardness do not reduce slip resistance**
- **Breathable and UV stable**
- **VOC Compliant**
- **Non-Flammable**
- **Non-Toxic**
- **Low Odor**
- **Eliminates the need for floor waxes, liquid polishes and other common coatings**

#### **REGULATORY COMPLIANCE**

V.O.C: 0

#### **FIRST AID**

**Skin:** If comes in contact with skin, it may cause irritation. Quickly wash with soap and water.

**Eyes:** If product gets in eyes, quickly flush with water for 15 minutes. Seek medical attention if irritation persists.

**Ingestion:** Do not swallow, may be harmful. Seek medical attention immediately.

**Inhalation:** Remove to fresh air. Seek medical attention immediately if problems continue.

#### **TECHNICAL DATA**

FORM	Viscous milky white liquid
SPECIFIC GRAVITY	1.01
pH	Not available
WT/GAL	Not available
ACTIVE CONTENT	Not applicable
TOTAL SOLIDS	Not applicable
VOC CONTENT	0
FLASH POINT	Not applicable
FREEZE POINT	32 F
SHELF LIFE	Not available

#### **LIMITATIONS**

- Not for use on surfaces exposed to standing or pooling water
- Seller offers no warranties, expressed or implied, for any particular purpose which extend beyond or within description and/or limitations pertaining to this product. Persons testing for desired results and effects to determine suitability of this product performance, for any intended or unintended purpose shall be solely responsible for any unforeseen outcome related to this product.

#### **WARRANTY**

All instructions are considered guides and should not be considered complete. In the event of failure, the only obligation of Stone Pro's shall be to replace products proven to be defective. Before using, user shall determine the suitability of product for there intended use. User assumes all risks and liability whatsoever in connection therein. Neither seller nor manufacturer shall be liable for any injury or inability to use this product.

# **POLISH PRO CT**

**CONCRETE & TERRAZZO POLISH**

## **ALWAYS TEST**

ALWAYS TEST a small area of each surface to determine suitability and desired results prior to starting the overall application. Test with the same equipment, recommended surface preparation and application procedures planned for general application.

## **PREPARATION**

Protect people, vehicles, property, plants and all surfaces not designed to receive POLISH PRO CT from product splash and wind drift.

Do not apply to surfaces which are frozen, dirty or have standing water.

## **EQUIPMENT**

Buff or burnish with a 175 RPM swing machine or 1500 - 3000 RPM electric or propane burnisher and a hogs-hair extreme pad.

## **COVERAGE**

Variations in concrete quality, porosity, job site conditions, temperature and relative humidity will affect coverage rates and drying times.

- 1,000 sq. ft. per quart

Apply POLISH PRO CT in small increments as you work the machine and completely buff off. DO NOT spray entire floor... Spray and buff as you move throughout the floor.

## **Surface and Air Temperatures**

Temperatures for application should be 40-100°F (4-38°C).

## **APPLICATION**

ALWAYS TEST for suitability and desired results before overall application. Let test area thoroughly dry before inspection.

## **DILUTION**

Do not dilute.

## **APPLICATION INSTRUCTIONS**

1. Make sure surface is clean, dry and free of any debris.
2. Spray 2 - 3 pumps of POLISH PRO CT directly onto the floor and immediately buff off with a hogs-hair extreme pad.
3. Apply 2 -3 additional spray pumps and repeat.
4. Repeat as necessary until there is no further improvement in polish. (3-5 repetitions are common)
5. DO NOT apply too much product. Too much product will increase the chances of streaking.
6. Less product, more repetitions will yield the best results.
7. No clean up necessary.

## **BEST PRACTICES**

For best results, floors should be polished with abrasives up to a 400 - 800 grit mechanical polish prior to applying POLISH PRO CT.

For best durability always use SMARTKLEAN L for maintenance cleaning of polished SMARTKRETE floors. Conventional floor cleaners may contain ingredients that can dull high-gloss finishes. SMARTKLEAN L contains no harsh acids, alkalines, solvents or abrasives. It does contain lithium-silicate to help maintain the hardness and density of floors treated with densifiers.

## **CLEANUP**

No clean up is necessary.

## **STORAGE AND HANDLING**

Store in a cool, dry place. Always seal container after dispensing. Do not alter or mix with other chemicals. Maintain temperatures of 40-100°F (4-38°C). Dispose of unused product and container in accordance with local, state and federal regulations.
