5X POWDER

Marble & Travertine Polishing Powder

For decades marble factories have used 5X to achieve the high reflectivity finish that is seen on polished marble tiles and slabs.

This powder is used as a final step in achieving that super high finish on marble, travertine, limestone and other natural marbles. Crafted from a blend of premium powders to achieve a deep, mirror like finish. For floors, walls and countertops.

For Use On:

marble, travertine, and limestone

Available Sizes:

3lb. & 50lb.

Product Features:

- High quality 5X for restoration professionals
- Fast results
- Use as a final polish or a maintenance polish
- Can be used on floors, walls & countertops
- Added shellac increases polish and helps reduce etching the surrounding areas.

Application Instructions:

1) Mask-off and protect any areas not being polished with **5X Powder**. **2)** Place approximately 1 teaspoon of **5X Powder** on area to be polished (appx 4 - 6 sq. ft.). **3)** Add clean water to powder to create a slurry paste. **4)** Work paste with low-speed swing machine and a white or hogs-hair pad for 4 - 7 passes. **5)** Add more water to slurry and work machine and pad for an additional 4 - 7 passes. **6)** Once slurry starts to dry, add more water to loosen up the slurry and vacuum up slurry with a wet vacuum (use a soft rubber based nozzle head). **7)** Evaluate results and repeat process if necessary. **8)** Repeat steps 2 - 7 on the section of floor to be polished. **9)** Once all polishing has been completed on the entire floor, neutralize and mop the floor with an Alkaline cleaner (StonePro Deep Clean recommended).
